for the clinical setting

Relax. Relieve. Refresh.[®]

Improve Quality of Life in Elder Care Customers Share their Stories...

*“My mother has suffered from Alzheimer's / Dementia for 10 years and has extreme anxiety and anger because of the disease and her fear. **After two days of Elequil Aromatabs[®] I felt like I had a piece of my mom back.** She was calmer and we had a conversation that was personal and made sense. I can't tell you how grateful I am to have found that this has helped us.”*

~ M. Merriman, Eugene, Oregon

*“My wife has had early onset Alzheimer's for 8.5 years, is now 58 years old and is at level 6 of 7. I still take care of her except we have a caretaker M-F 8:30-4:30 so I can go to work for “therapy”. **On days that she is agitated, we put an Elequil on her and it helps tremendously.**”*

~ Bill M, Schereville, IN

*“My wife has been diagnosed with Alzheimer's for about 10 years. A nurse at the nursing home that she recently entered indicated that she frequently showed excessive agitation and/or discomfort and was prone to walk excessively. She suggested that Elequil[®] lavender aromatabs have shown significant calming in certain residents for whom she cared. I ordered the lavender aromatabs and **there was a marked improvement in her agitation. She was taken off all her neurological medications and the nurses put an Elequil aromatab on her every day. Her agitation has subsided markedly and she appears content and very sociable** with staff and other residents.”*

~ Don, Massachusetts

*“We used Elequil Aromatabs[®] for when **relaxation or comfort for palliative care** was needed—the lavender scent was VERY helpful. Other times for when a resident displayed a bit of anxiousness for one reason or another—the orange-peppermint was absolutely perfect!”*

~ Director of Therapeutic Recreation & Volunteer Services,
CT. Baptist Homes, Meriden, CT

*“We have a resident that wasn't sleeping. He will not sleep for two nights, and then on the third day, he collapses from exhaustion and sleeps 8 hours. With Elequil Aromatabs, **he is relaxed and sleeps much better** than before at a steady 6 hours a night.”*

~ Director, Long Term Care Center, Fairfield County, CT

*“We did the five day trial on three residents at our long term care facility and had great success. **We found that the Elequil aromatabs help a lot with anxiousness, restlessness and relieved some confusion.** We followed up the trial with our first order of Elequil and started using them immediately on more residents. The Elequil aromatabs have had such great success that residents have even requested them. **We are so happy and excited to have access to such a great natural product with no ill side effects.** I would recommend this product to other hospitals or facilities to try and see the amazing effects for themselves.”*

~ Debra, Santa Maria, CA

*“Our facility has been using the Lavender-Sandalwood and **have seen an improvement in relaxation patterns** of many of the residents.”*

~ Palliative Care / Pain Resource Nurse RN, CMSRN,
Mercy Living Center, Clinton, IA
