Elequil aromatabs® testimonials specific to MRI

MRI Patient Testimonials:

The aromatabs are a life saver. I was trampled 5 years ago at a sporting event and **have been unable to complete an MRI ever since due to my anxiousness and fear of tight spaces.** I was sitting in the room waiting, losing my mind because I forgot my Valium when I saw the sign about aromatabs. The tech gave me one and **it made a world of difference and I was finally able to complete my first MRI in 5 years.** Thanks.

~ Kisha, Greenbelt, MD

I recently had my first MRI at Diagnostic Imaging. I was **initially very anxious** when I was entering the open MRI. The tech had to bring me out and **offered the lavender tab and I was calmed instantly and was able to complete the 20 minute MRI without further incident.** I am a true believer in this product!

~ C Shaw, Milford, CT

I was first given a tab to use by the Radiology Dept at the Mt. Kisco Medical Group in Westchester County, NY. I was scheduled for a battery of tests including MRI's and MRA's and was **very anxious** both because of my diagnosis and the actual testing. I was given the lavender/sandalwood tab and initially was not very optimistic re its impact...I was wrong!! The scent is so soothing and calming and somehow managed to calm me during the procedure. I asked the staff who were kind enough to give me an extra one that I wore the day of my surgery! **It helped me enough that I did not have to take Ativan or Valium or any other agent during the testing process.** I highly recommend trying this product...I think of it as a calming agent that you don't have to drink or take in pill form! I am also a retired Physician Assistant who worked 30 years in Psychiatry and plan to return to work part time after my medical issues resolve. I will most likely use this product on my anxious patients, and I feel very hopeful with its results. Congrats to the developers of this tab...you succeeded!!

~ Diana, Scarsdale, NY

I recently completed over two hours of MRI / MRA testing. The technician attached a Lavender Sandalwood Elequil aromatab to my gown as he prepared the MRI equipment. During the testing I noticed a subtle scent that helped me relax but I didn't know where it was coming from. The technician later explained that he used an Elequil aromatab. **I'm amazed such a small thing can make such a significant difference to promote relaxation** – but it worked beautifully. Elequil aromatabs promote relaxation and in turn reduce anxiety and pain.

~ Marie, Texas

I had an MRI today and was **very anxious** about it. I was offered Elequil aromatabs, the Orange-Peppermint. I'm in love with this! Oh my gosh did it ever make a difference!!! I'm so happy to be introduced to these. **My MRI lasted about an hour and it was actually pleasant.**

~ Cindy, Euless, TX

I have been going through many diagnostic tests in the last two weeks and I noticed a great offering when I was going into the MRI – the scent tabs. I chose the calming lavender. **It was wonderful-very soothing.** I felt that this additional help was so good I asked the nurse where I could get them! She wrote the name of the company and I called. The patches were that good! I looked them up online but it was a Friday. **I asked for the scent tab at my next MRI.** I called today after using them under my pillow that night. I was thinking I wish I had access to a box of them! I knew many others that would probably feel the same way! The positive effects of aromatherapy are so well-known and **this simple tab is so convenient!** I hope these can be made available for everyone to use whenever and wherever they would like to enjoy a calming inhalation of lavender. Excellent product!

~ Kathy, Green Bay, WI

MRI Imaging Center Testimonials:

We have used Elequil aromatabs at our facility for 4 years. **We have almost eliminated our loss of scan due to uneasy feelings from being in an MRI.** Our patients are thrilled with the product.

~ MRI Manager, SportsMED Orthopaedic Surgery & Spine CenterHuntsville, AL

The use of the Elequil aromatabs have made their way into our Nuclear Medicine department this year and we now have outpatients requesting the aromatabs in the initial phone contact with our scheduling department for MRI scans. **We in MRI are believers that the use of aromatherapy can be used instead of medication to help patients with anxiousness in MRI.**

~ Theresa H., Methodist Hospital of Southern California

Elequil aromatabs have been very beneficial for fretful patients

during Breast Interventional Procedures and for the MRI patients. The biopsy patients are more relaxed and we are experiencing fewer cancellations.

~ Mammography Quality Control Coordinator
Jefferson Radiology, Farmington, CT
